REACH - declaration

Dear customer,

FuG-Elektronik GmbH as a manufacturer of electronic products is a „Downstream User“ in the sense of REACH. You are purchasing from us exclusively non-chemical products (goods). Further, from the goods, purchased by you, under normal and reasonably predictable conditions of use, no material should be released. Therefore FuG Elektronik GmbH is not subject neither to registration obligation, nor to obligation for creating safety data sheets

In addition, according to REACH – Art. 33, we will inform you immediately, when ingredients of our products (with a percentage of > 0,1 %) will be classified by the European Chemicals Agency (ECHA) as particularly worrying. As things stand, however, we do not assume that this will happen in the next time.

Regardless, to ensure a high product safety for our customers and in our own interests, we are intensively pursuing the implementation of REACH from side of our suppliers. We are in close contact with our suppliers of chemical substances and preparations (for example, raw materials, and supplies for manufacturing, treatment and processing of our products or for use in other operational processes) and we will include to our supplier qualification, the pre-registration and subsequent registration of the relevant substances in REACH.
