

CORPORATE POLICY

In order to manage FuG Elektronik GmbH successfully it is indispensable to lead and guide our business systematically and observably.

The policy for FuG's Quality Management is based on the following principles:

- DIN EN ISO 9001:2015
- Legal requirements

The following quality principles have been developed being used by our management team in order to guide FuG Elektronik GmbH continuously to outstanding success.

1. Customer focus

Our company is depending on its customers. We determine existing and future customer needs as well as market requirements. Thus, we have set ourselves the target of fulfilling these requirements and demands.

2. Management responsibility

Management's task is to implement and embed sustainably the purpose as well as the strategic direction of our company in its processes together with our employees.

Our Management is creating, maintaining as well as improving the company's internal environment to fully enable our employees to achieve the company's targets.

3. Employees

Throughout all levels our employees represent the character of our company. Their complete involvement enables them to use their skills in an optimal way to achieve the company's targets.

4. Processes

Targets and results will be reached more effectively and efficiently if activities and corresponding resources are being recognized, understood, directed and implemented according to defined processes.

5. Systems

Recognizing, understanding, guiding and implementing related processes seen as part of a comprehensive system is contributing to achieve the company's prospects in an effective and efficient way.

6. Continuous improvement

The continuous improvement of the company's overall performance is a consecutive company target which is embedded sustainably in the individual divisions, departments and processes and which will be put into practice.

7. Fact-based decisions

Effective decisions are based on the analysis of figures, data and facts.

8. Supplier Relationships for a mutual benefit

Our suppliers as well as our company are mutually dependent. These supplier relationships which are based on a mutual benefit are increasing the ability to create added value.

9. Environmental orientation and resource efficiency

Acting consciously regarding quality means for us also to deal efficiently and environmentally friendly regarding resources.

By implementing the above-mentioned quality principles FuG's quality policy is going to be realized. Thus, our quality policy is providing our employees a binding guideline in order to act quality-consciously, customer orientated and responsibly.

OUR GUIDING PRINCIPLE OF CUSTOMER SATISFACTION AND QUALITY

Our products and services are to meet the needs of customers with special regards to quality, processing, reliability, finish, and dependable delivery, in accordance with his specific requirements to achieve the best results.

OUR GUIDING PRINCIPLE OF CORPORATE CULTURE

Our corporate objectives are to strive together with our employees who actively participate in safeguarding the long-term future of our company and the preservation of jobs.
